Good Morning,

Here is breakdown for my appeal on the drainage.

The cost that I am looking to reallocate is \$1000.00, this I would like to direct to the Thames Centre Municipal Fire Station.

When the Fire Station was built the drainage on my property was affected. The elevation of the land was changed to have the water shed sent to the neighbouring property along with running to the catch basin on the northwest driveway at the Fire Station. With this happening there is no where for the water to go that is collecting at the low side of the property line on the east side. I am now having to spend money to correct this situation which could have been looked at differently during the planning stages of the Fire Station build.

Thanks

Dan Jones
